

INFORMATION AND COMMUNICATION TECHNOLOGY – ICT – POLICY

Information and Communication Technology (ICT) shall be a basic instrument in the development of the Siem group of companies as an effective and collaborating organisation.

ICT shall be used actively in order to increase the quality and efficiency of the organisation.

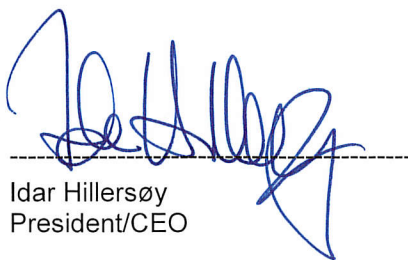

We aim to use ICT in a way that give the customers all relevant data about the operation of their chartered vessels as easy, fast and secure as possible.

We aim to have all users on a level where they are capable of utilizing the ICT tools which the Company places at their disposal, and will arrange for necessary training to reach such level.

Technical security mechanisms shall be established in such a way that the information stored in the ICT systems is adequately secured.

We shall use modern equipment, including hardware and software that enable the Company to reach the goals in a cost effective way.
